

RAIL SAFETY AND TANK CAR AWARENESS

VIRTUALLY, ANYTIME, ANYWHERE

Everyday dangerous goods are transported through Canadian communities – goods essential to our daily lives.

For nearly 30 years, TRANSCAER's CCPX 911 Safety Train has helped first responders learn about managing these risks. TRANSCAER's new virtual reality tour of the CCPX 911 provides first responders with an opportunity to increase awareness and familiarization of rail safety, railway equipment, and transportation of dangerous goods. This program offers a flexible way to learn about rail safety virtually.
